

Applications are due August 31.

The event is November 8 to 9.

Lists are not due at this time - these will be requested at a later date!

Please be sure to have a fully painted and based army by the event date! No exceptions!

The point value for this event will be 2500 points.

We will not be using unique or named characters for this event, including Primarchs.

HOGTOWNER HERESY 2025

APPLICATION FORM PRELUDE

Important Details

Please save the following document with your answers filled in and email it along with your images to Heresy@hogtown40k.com with the subject line:

"Your Name - Hogtown 2025 Horus Heresy Application".

Photos and Other Additions

Please attach 5 close up, high quality, bright photos of your army/armies.

A full army picture is not necessary, but it is important to note that the Hogtown team weighs the hobby aspect heavily in the application process. Given the limited event space of this narrative event, we want to craft an amazing story around your beautiful models.

We understand that everyone holds a wide range of skills and aesthetic preferences, so reiterating the fact that good photos of your hard work will go a long way is an understatement!

Please take your time and if needed reference the image below for tips. Your favourite characters or ones you've included in your fluff, full squads, battle action shots, or set up scenes are all welcome and encouraged.

PHOTOGRAPH YOUR MINIATURES

TOP TIPS UPDATED!

MOST CAMERAS WILL DO

For posting to Facebook, most smartphone cameras do a good enough job (especially if you follow the rest of the advice here).

LIGHT IT UP!

Place light sources on either side of you model. If you're serious, invest in daylight lamps.

CROP IT

Get close enough to capture detail without clipping off details around the edges.

SET THE SCENE

Consider the background your miniature needs. We mostly shoot on white — a simple sheet of paper should do the trick.

THE GOLDEN ANGLE

Every miniature has a golden angle, a viewpoint that best captures the essence of the model.

FOCUS!

Make sure your camera is focused on the right point. If you plan to submit them for viewing online, check them on a computer screen.
